**+256776746882**

## Personal profile

Esther is an Entry Level Software Developer who is passionate about developing the best frontend interfaces to facilitate interaction between the users and the website. With her skills in software development, she has been able to develop a weather app that tells the current weather of a specific city using an API. She enjoys being challenged and engaged with projects that require her to work outside her comfort and knowledge set. She is currently seeking an internship as a software developer to use her skills and grow.

## Technical Skills

- Knowledge of translating the UI/UX design wireframes to actual code that will produce visual elements of web applications.
- Capable of manipulating the structure of web pages using DOM manipulation in JavaScript.
- Able to improve interactivity of web pages using JavaScript, HTML and CSS
- Good understanding of asynchronous request handling and AJAX.
- Can develop simple mobile applications with RecyclerViews in Kotlin.

## Education

**AkiraChix Feb 2021 - Present**

codeHive program - Diploma in Information Technology.

## Courses
